EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Bruce Adams, no. 25,386 on 22 July 2005.

The application has been amended as follows:

In the claims:

Claim 26: in line 2, "an indicator wheel to be detected a rotational position" has been replaced with --an indicator wheel whose rotational position is to be detected--.

2. The following is an examiner's statement of reasons for allowance:
3. Regarding claims 1 and 26, the prior art of record does not teach or render obvious a hand position detecting apparatus having all of the structure and functionality as claimed, including a rotational position detector to detect a rotational position maximizing a light receiving amount within a rotational range of the indicator wheel having the light receiving amount equal to or higher than a lowest reference level by which the light receiving element can be regarded to receive the light emitted from the light receiving element and reflected by the reflecting face.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
